STAEDTLER – your inspiration since 1835

Whether a brilliant idea, fleeting thought or quickly-jotted note – STAEDTLER offers intelligent writing and colouring instruments and creative products for any and every need or situation. It's therefore no wonder that we can proudly claim to give form to the ideas of people the whole world over. We see our products as helpful tools for promoting the flow of creative thought, coupled with the exceptional comfort and innovative product features that are sure to make STAEDTLER your favourite product.

We guarantee:

There is a brilliant idea behind every STAEDTLER product. Since the company's founding by Johann Sebastian Staedtler in 1835, STAEDTLER has made use of the long tradition of the Nuremberg-based, pencil-making family. As early as 1662, Friedrich Staedtler, an ancestor of the company founder, was already mentioned in the official annals of the city of Nuremberg as a "Bleistiftmacher", or lead-pencil maker. Through our centuries-long experience and special advances in research and development, we have developed innovative products with the highest brand quality.

Our success speaks for itself: STAEDTLER has long since joined the ranks of worldwide leading manufacturers and suppliers of writing and drawing instruments and creative products: We are the largest manufacturer in Europe for pencils, coloured pencils, erasers and modelling clays, the only European manufacturer of mechanical pencil leads and market leader for industrial clay. STAEDTLER loves to show ideas and give inspiration. Therefore, let yourself be inspired by our products for colouring, marking, writing and modelling.

Quality "Made in Germany"

STAEDTLER's roots are in Nuremberg – still the headquarters of the STAEDTLER Group. We proudly stand behind Germany as a business location and the tradition of the Nuremberg pencil-makers. Worldwide, more than 80 % of products manufactured by STAEDTLER are "Made in Germany".

STAEDTLER
S T I F T U N G

Ideas and knowledge are the key to the future!

Since 1997, all shares of the STAEDTLER Group are held by the STAEDTLER Foundation, a public foundation under civil law that supports innovative ideas and knowledge. The purpose of the foundation is to promote scientific research at German universities and support cultural projects.

When ideas grow, responsibility grows as well!

© SOS Kinderdorf e. V.

As the size and international reputation of our company grows, so does our responsibility to present and future generations. For this reason, we support and initiate projects that promise a future that is fair and worth living for – all over the world. One example: the World Kids Colouring Day on 6th May.

Understanding the world through colouring

There's no limit to a child's creativity. When young artists get going, there is nothing they can't do. This holds true for colouring in particular: New, fantastic worlds emerge from a collection of lines, shapes and colours. And, not only is colouring fun, it also plays a key role in a child's development. It is through pictures that we learn to understand the world in which we live and to express our own ideas. Our creativity paves the way for us come to grips with an ever increasingly complex society and to explore new paths.

STAEDTLER not only offers just the right tools for this, but also actively supports boys and girls all over the planet in learning to rediscover the world of colouring for themselves.

All over the world, children, school and nursery school teachers and parents participate in local colouring events, thereby actively contributing in making the 6th May a success. In 2012, for example, over 1 million young artists around the globe took part – from North America to Japan and even as far away as Australia.

Colouring moves the world

So, on World Kids Colouring Day, initiated by STAEDTLER in 2008, children not only move a pencil, pen or crayon,

exchange for a small donation which goes towards supporting different educational projects around the world. As "children colour for children in need" is the motto of every World Kids Colouring Day.

On the 6th May, colouring is on the (time-) table

Together, we can move the world – that's why it's not just children we need on World Kids Colouring Day, but adults too. Get together with your class, your group or your club on World Kids Colouring Day and organise your own colouring event, rediscover how much fun colouring can be and – at the same time – take part in a world-wide fundraising campaign. Tips, ideas and further information for both groups and individuals on how to take part in the different participating countries are available at

www.world-kids-colouring-day.com.

they move the entire world. Every year on the 6th May, budding artists put their ideas to paper on an annually changing theme and bring them to life. Afterwards, the works of art are given to family and friends in

Environmentally safe, not just environmentally friendly – that's the idea!

The protection of the environment, the consumer and the employee all hold a very high degree of importance in the STAEDTLER corporate philosophy. Everything we do should be safe for our environment, and as such, safe for human beings as well. This enduring spirit of environmental consciousness at STAEDTLER is a contribution to protecting the quality of life for present and future generations.

STAEDTLER acts ecologically AND efficiently at the same time!

We have adopted the ambitious standard of producing products that not only are especially environmentally compatible, but which impress and convince through their longevity and high user benefit. We call this perfect interaction between ecology and efficiency : **efficient for ecology by STAEDTLER.**

STAEDTLER acts ecologically

The products we have developed often fulfil many ecological criteria from the very beginning. We achieve this through self-imposed eco-controlling programme. Environmental compatibility is already incorporated in the development phase of new products and manufacturing processes: Raw materials and energy are used as sparingly as possible and close attention is paid to recycling possibilities and reducing the amount of waste and refuse.

STAEDTLER acts efficiently

Through high environmental consciousness, savings take place at all levels. The goal is a reduction of CO₂ emissions in all processes. In addition, we pay close attention in the development phase to the high user efficiency and longevity of our products.

Environmental and quality management – for long-term success!

Quality management, quality assurance and environmental protection are among our priority company tasks.

In order to ensure a continuous improvement in our environmental and quality performance, our processes are regularly subjected to internal and external audits.

This forms the basis for an efficient identification and utilisation of potential for optimisation.

In November 2011, all German production plants and the head office of the STAEDTLER Group in Nuremberg were audited by DQS (German Association for the Certification of Management Systems) and successfully certified according to ISO 9001 and ISO 14001. It is at these certified production plants that more than 80 % of all STAEDTLER products manufactured worldwide are produced. In the medium term, all international production and sales bases will be audited and certified.

The mark of
responsible forestry

Certified – for the sake of the environment!

We set particularly high standards when it comes the sourcing and processing of wood, one of the most important raw materials as far as the manufacture of wood-cased STAEDTLER pencils is concerned.

As a result, STAEDTLER Mars GmbH & Co. KG has been granted Chain of Custody (CoC) certification in accordance with valid FSC™ (Forest Stewardship Council™) and PEFC standards for the production and trade of wood-cased pencils.

All certified wood-cased STAEDTLER pencils are ecologically efficient products – true to our environmental philosophy. The “efficient for ecology” logo and “certified wood pencils” wording on product packaging clearly emphasise this. The certification underlines STAEDTLER’s commitment to the environment and its responsible use of indispensable wood raw materials and composites. In the endeavour to secure sustainable quality when it comes to living and environmental conditions, all manufacturing processes at STAEDTLER are subject to the company’s “efficient for ecology” philosophy – not only today but in the future as well.

Ecological added value from the very beginning!

STAEDTLER wishes to ensure that our products and their production burden the environment as little as possible. For this reason, all processes are subject to the motto “efficient for ecology”. The following areas are continually examined with regard to their ecological efficiency.

- Waste management
- Waste prevention
- Internal and external recycling concepts
- Own wastewater treatment
- Energy management
 - Recycling of wood chips
 - Heat recovery
 - Recuperative firing (energy savings in lead kiln)
 - Use of natural gas instead of fuel oil
 - Noise reduction
- Own solvent recovery
- Emergency management
- Recycling within the manufacturing processes, such as for plastics and lead compound material
- Continual process optimisation
- Value stream mapping
- Research and development as well as quality management

efficient
for **ecology**

Products for a longer service life

We develop clever production solutions that are not only environmentally friendlier, but above all are more efficient for the user as well. As such, we place

high importance on the longevity of our products – because something that lasts and lasts doesn't have to be replaced for a long time to come.

Examples of high user benefit and longevity:

DRY SAFE: the end of dried-up pens and markers!

When creativity is flowing along smoothly, it sometimes happens that pens or markers don't get recapped right away. STAEDTLER's innovative DRY SAFE ink technology makes it possible for our pens to lie uncapped for days at a time, without drying up. As such, the service life is increased considerably.

The STAEDTLER box: the award-winning original.

Simply open, stand it up and start writing! The unique STAEDTLER box is so practical and just as ecologically efficient: Without the need for additional external packaging, it serves as a practical storage box and clever pencil holder at the same time.

A-B-S: uninterrupted creativity.

Especially with children, coloured pencils have to be able to stand up to a lot of punishment: The unique Anti-Break-System (for short A-B-S) increases their service life. Because the richly coloured, high-quality lead core in our coloured pencils with A-B-S is surrounded by a unique white protective coating. It is so hard and resistant that the break-resistance of the coloured lead is increased by up to 50%, making the pencil up to 30% stronger.

Efficient products and manufacturing processes

Quality and high ecological efficiency are reflected in many of our products. Here, the use of harmless and environmentally-safe materials is tested as diligently as the special manufacturing process.

Some of the outstanding examples that have earned the "efficient for ecology" title are:

1. Wood-cased pencils "Made in Germany"

- Our own high-coverage special lacquers make thin lacquering coats possible and thus are particularly easy on existing resources
- Fast-drying lacquer means no additional energy required for drying
- Highly-precise woodworking technology makes best possible use of the raw material wood
- The use of special adhesives ensures fast drying and short process times

2. Pencils

- Use of natural instead of synthetic graphites
- The high stability and strength of the leads enable longer writing with fewer interruptions
- Optimised formulations for minimal oven temperatures generate lower energy needs
- The heat from the oven process is used for heating of the building

3. WOPEX

- WOPEX is an advanced, innovative pencil: the WOPEX material is a natural fibre material with 70% wood and stands for an efficient production of pencils with a significantly higher utilisation of wood per tree
- The wood for WOPEX pencils comes from PEFC-certified, sustainably managed forests in Germany
- WOPEX has an excellent lead stability and break resistance, offers a unique writing experience thanks to the special, velvety soft surface etc.

4. Coloured pencils

- A-B-S – special lead coating increases break-resistance by up to 50 %
- Water-based manufacturing procedure avoids waste products that burden the environment
- Exhaust from manufacturing is efficiently cleaned

5. Mechanical pencil leads

- Made more than 90 % from natural materials, with high graphite content
- Unique manufacturing process completely without PVC or softeners
- High mineral elasticity ensures high break-resistance

6. Lumocolor

- Special DRY SAFE technology prevents the pen from drying up
- The STAEDTLER refill station enables clean and environmentally-friendly refilling
- Materials from injection-moulding process are recycled and reused

STAEDTLER coloured pencils with A-B-S: recommended by the „toughest testers in the world“

Coloured pencils in stability test!

Have you noticed it too? Your children have just started to enjoy colouring then because of hard pressing, dropping or sharpening the soft coloured pencil lead promptly breaks off. As the toughest testers in the world young artists give coloured pencils exhaustive examination.

STAEDTLER coloured pencils – recommended by children

Thanks to their worldwide unique Anti-Break-System (A-B-S) STAEDTLER coloured pencils best withstand the extreme trials of the young testers. Then the white protective coating that encases the lead core like a second skin increases the break resistance by up to 50%.

• The intelligent Point of Sale solution

The STAEDTLER VISTA system offers the ideal product presentation solution whatever the size of outlet. Thanks to the flexible assembly options offered by the three basic gondola units, a whole variety of means for presentation are possible from mid-room placement to shop-in-shop.

• Effective presentation – better sales

Different modules can be combined as required to provide an eye-catching, high-class presentation of STAEDTLER products. The clear structure makes it easier for customers to find what they're looking for, resulting in a faster purchase decision and better sales. High-quality lighting installations ensures a stunning presentation of products in the best possible light.

STAEDTLER generic pictograms

Ergonomic triangular shape
for relaxed and easy writing
and drawing

STAEDTLER Box
The award-winning original serves
as a practical storage box and
clever pencil holder at the same time

Unbelievably break-resistant
through special lead formulation
and super-bonded lead

Sharpening angle of 23°
for standard-sized blacklead pencils
up to 8.2 mm Ø for clear and
accurate lines

Sharpening angle of 30°
for standard-sized coloured pencils
up to 8.2 mm Ø for broad, soft lines

Sharpening angle of 30°
for thick blacklead and coloured
pencils up to 10.2 mm Ø for broad,
soft lines

Lead diameter
2 mm, round shape

Lead diameter
2 mm, hexagonal shape

Lead diameter
4 mm, hexagonal
jumbo format

Lead diameter
6 mm, hexagonal
super jumbo format

Lead diameter
2 mm, triangular shape

Lead diameter
3 mm, triangular jumbo format

Lead diameter
4 mm, triangular jumbo format

Crayon diameter
approx. 6 mm

Crayon diameter
approx. 8 mm

Crayon diameter
approx. 11 mm

Crayon diameter
approx. 12 mm

Crayon diameter
approx. 14 mm

Crayon diameter
approx. 9 mm,
triangular shape

Line width S

Line width F

Line width M

Line width B

Bullet tip
approx. 2 mm

Bullet tip
approx. 3 mm

Chisel tip

Variable line width
of approx. 1–2 mm

Two tips
line width fine tip approx. 1.0 mm
line width wide tip approx. 3.0 mm

Soft writing
Especially soft writing performance

Conforms to EN 71

Universal pen / marker
for labelling and marking of just
about every material

Recommended for CD / DVD
Extra-soft tip does not damage
sensitive CD / DVD surfaces; Ink does
not penetrate into data storage layer

Lightfast

Machine washable
Does not wash out of textiles

Weatherproof

Dries in seconds
therefor ideal for
left-handed users

Indelible ink
conforming ISO 12757-2

Airplane-safe
automatic pressure equalization
prevents pen from leaking on
board aircraft

OHP – overhead projector
Universal pen for use on overhead film

Locked tip

DRY SAFE
can be left uncapped for days
without drying up (Test ISO 554)

8h CAP OFF
can be left uncapped for 8 hours
without drying up (Test ISO 554)

18 h CAP OFF
can be left uncapped for 18 hours
without drying up (Test ISO 554)

Twist cap
for easy opening

Ventilated cap
conforming to ISO 11540 and
BS 7272-1/2

Easy to refill
with refill station

Easy to refill
with bottle

INKJET SAFE
does not smudge inkjet printouts

INK-JET SAFE
does not smudge inkjet printouts
and handwritten texts

**For paper, fax and
carbon copies**

Copy proof
violet and turquoise for documents
which are to be copied to avoid
thick black lines covering the text

Washes easily out
of most textiles

Water-based ink
with food colouring dyes

Specially-designed
for right-handers

Specially-designed
for left-handers

Twist eraser

Pocket-safe
thanks to retractable
lead sleeve

Cushioned lead
for high level of break resistance

**Ideal for use with rulers
and templates**

Refillable

12-a-go
easy to refill with „12-a-go“
Mars micro carbon 250
mechanical pencil leads

Push-button mechanism
innovative push-button mechanism
for single-handed use and refilling
of individual leads

ISO colour coding

Integrated lead sharpener
in push-button

Hand wiper
for dry-wiping of write-on film and
whiteboards that have been written
on with Lumocolor correctable or
whiteboard markers

Dry-wipe
can be dry-wiped without residue
from whiteboards and smooth surfaces
like glass and porcelain, e.g with
Lumocolor wiper 651

Integrated wiper
Non-permanent dry erase marker for write-on
films and other film surfaces such as sheet
covers, laminates and school whiteboards
with the integrated wiper in end plug

Made in Germany

PVC free

Latex and Phthalate free
